NUMBER 179.

MAY ENTER ACTION FOR DAMAGES AGAINST CITY

Mr. Asher Writes City Council Asking Settlement of Damages Claimed by Reason of Son's Death

Mayor May presided at the regular meeting of the city council last evening, and there were present, Aldermen Griebach, Picard, Calhoun, Manning, Bellamy, Lahti and Smith. It was approaching 8:30 when the aldermen sat down for the transaction of business.

Mr. Watson, of Revillon Bros., appeared in support of a petition protesting against boarding being placed around the sidewalk in front of the new Crystal building, which is in course of erection. Mr. Watson claimed that the barrier was an impediment to business. Mr. Kinnaird assured Mr. Watson that the bylaw which requires that the sidewalk be kept clear, would be strictly enforced.

Ald. Calhoun wished to know why the contractor on the King Edward hotel had been served with a subpoena for blocking the sidewalk, while the contractor on the Crystal building had not. The sidewalk in front of the King Edward hotel, Ald. Calhoun said, had been blocked by a city employee taking up the sidewalk, and not by the contractor of the building.

Ald. Calhoun turned to Mr. Blaney, the building inspector, and inquired of him if he could read the plans of buildings. Mr. Blaney said "Yes."

Ald. Calhoun: "If a prominent contractor had made the statement that you were unable to read plans, would he be speaking the truth?"

Mr. Blaney: "No, he would not."

G. S. Armstrong, who is building a new drug store on the corner of Namay and Boyle, had a complaint to make. He said that he had taken the elevation for the first floor of the store from the level of the old sidewalk, and he now discovered that the new cement walks were being built on a lower elevation and that the door of his store would be considerably higher than he expected. He asked the permission of the council to place a stone step on the sidewalk at his door or that the elevation of the sidewalk be raised. He said that before laying the first floor he had come to the city offices upstairs and inquired about the elevation at that particular corner of the street. He was told that nothing was known about it. This gave rise to a remark from Ald. Lahti that the city employees in the offices were not paying strict attention to business when a stranger received such an answer as that. The complaint was left with the city engineer to report.

Mr. Oliphant, a city automobile dealer, appeared and spoke on behalf of several other automobile men who were present, regarding the bylaw restricting the keeping of gasoline on their premises. The bylaw permitted them to keep no more than five gallons. It was absolutely necessary for the automobile men to have on hand considerably more than five gallons of gasoline, and they sought an amendment to the bylaw which would help them out of their difficulty. Mr. Kinnaird explained that a large quantity could be kept provided that the building had solid brick walls, with metal roof and metal doorways. Mr. Oliphant said that these provisions were applied in no other town in the world and that the person who drew up such a by-

(Continued on Page Five)

TOTAL DOUBLE OF LAST YEAR

City Assessor Has Work Completed For Current Year.

The city assessor has completed his arduous task. He began at the western limit of the city, continuing to the eastern limit, and finally, Norwood and Parkdale. The lots are arranged in consecutive order and assessed without reference to owners.

The roll is divided into four parts. The first part deals with the assessment of the land without reference to buildings. The second part comprises the business houses which are taxed according to the floor space occupied. The rate varies with the kind of business conducted, banks being the highest. Another list includes those assessable for income. The fourth includes those taxable for special franchises.

Norwood and Parkdale with additions are assessed only for school purposes. The assessor estimates that there is over a million dollar of property non-taxable in the city, and that the total assessment this year will be double that of last year. Of course that does not necessarily imply that the taxes will be similarly increased. That will depend upon the rate, which with a large assessment will be comparatively low. The assessor says he has tried to fix the assessed value as near the sale price as possible. For example the property recently purchased by Mrs. Everard Cotes at \$22,000 is assessed for \$19,975.

The statute asserts that from such assessment no appeal can be granted. The court of revision meets on August 27th.

SOCIAL AND PERSONAL

Fred Erwin, of Vegreville, is registered at the Queen's.

Norman Reid, of Port Elgin, Ont., is in the city today.

Mr. H. W. McKenny M.P.P. for St. Albert, and Mrs. McKenny accompanied by friends left yesterday for the Coast.

J. B. Holden, of Vegreville, newly elected member of Alberta Legislature for Vermilion, is in the city, a guest at the Imperial.

F. Ruse, a former resident of the city, and for some time leader of the McDougall church choir, came in from Ontario last week and will spend some time in town.

FRUIT FARM FLOURISHES.

Winnipeg Free Press.—J. O. Kilgough, of Fairville, ten miles northwest of Poncha, Sask., has 5,000 growing fruit trees. An orchard of 1,000 trees planted five years ago is doing splendidly. Some of his experiments are of great interest. He has made a great success of grafting white and black heart cherries on to the wild red cherry stock of the country. Trees thus grafted are bearing as prolifically this year as the natural stock. Plums too, are doing remarkably well, especially the Desoto plum. As to small fruits Mr. Kilgough has gone in heavily for raspberries, currants, gooseberries and the like, and expects that they will do well.

"Can you make a commercial success out of fruit growing in your district, Mr. Kilgough?" he was asked by a Regina visitor to his place.

"Well," was the answer, "I did not go into it for that purpose, but I am quite certain that it can be made a commercial success. Of course, our fruits will never rival those of Ontario in quality, except perhaps berries, but fruit growers here have an enormous initial advantage in the saving of heavy freights and in being able to put their product on the market in first class condition. I certainly think that soil should be carefully selected as well as the climate. Then, with a certain amount of winter protection, my experience goes to prove that the business may be made profitable."

WHAT THE CENSUS SHOWS

The census returns published yesterday show a large increase of population in every city and town in Alberta. The increases figure out approximately at the following percentages on the respective populations of 1901:

	Per cent.
High River	565
Red Deer	340
Edmonton	339
Poncha	213
Wetaskiwin	200
Calgary	192
Lacombe	103
Fort Saskatchewan	91
Strathcona	89
Cardston	57
Macleod	44
Lethbridge & Stafford	42

The increases show that since 1901:

The population of High River has more than doubled twice.

The population of Red Deer has more than doubled twice.

The population of Edmonton has more than doubled twice.

The population of Poncha has more than doubled.

The population of Wetaskiwin has nearly doubled.

The population of Calgary has more than doubled.

The population of Lacombe has more than doubled.

The population of Fort Saskatchewan has nearly doubled.

The population of Strathcona has nearly doubled.

The population of Cardston has increased more than one-half.

The population of Macleod has increased nearly one-half.

The population of Lethbridge and Stafford has increased nearly one-half.

The total increase of urban population during the five years was 29,801.

The total increase in the cities and towns north of Red Deer was 12,206.

The total increase in the cities and towns south of Red Deer was 10,298.

The percentage increase throughout the province was nearly 17 1/2 per cent.

The aggregate increase in the cities and towns north of Red Deer was nearly 222 per cent.

The aggregate increase in the cities and towns south of Red Deer was nearly 133 per cent.

EXPLANATORY.

The publication of the census returns yesterday has given rise to some comment. A number of people are wondering how complete returns could have been published since these same persons had not been called upon by the enumerator.

The Bulletin called upon Mr. McPhail, the census commissioner here for an explanation this morning. Mr. McPhail informed the Bulletin that the only enumerator who had not sent in complete returns was Mr. J. B. Walker, but that Mr. Walker had assured him that he had accurately ascertained the population of the district assigned to him, although many homes were closed on the days he made his visits. From Mr. Walker's knowledge and familiarity with his district he was able to give the population, but could not give the supplementary information until he had consulted the residents individually.

Mr. Walker was seen by the Bulletin while on his rounds, enumerating, and he confirmed Mr. McPhail's statement.

The returns were published subject to final revision and correction and Mr. McPhail will be glad to have any who have been overlooked to notify him and the enumerator will call upon them at once.

The publication of yesterday is really not official. No official report will be issued until about the end of September when all the returns pass the examination of A. Blue, chief census commissioner at Ottawa.

DOUBT L. ADVANTAGES

(Special to the Bulletin)
 London, Aug. 1.—The Globe referring to Earl Grey's visit to Newfoundland says: "Were Newfoundland to be incorporated into the Dominion the advantage to her would be problematic, especially since the whole trend of Canadian development has become more and more west to the province."

NEW SYSTEM SATISFACTORY

Will Secure Responsible Government Under the British Flag

(Special to the Bulletin)

London, Aug. 1.—As the government's proposed constitution for the Transvaal outlined in the House of Commons by colonial under Sec. Churchill, Tuesday afternoon, is more and more considered it is generally admitted that in most instances it will fill the needs of the former adherents of the South African republic while still leaving the British Government in a position to retain control.

NEW GOVERNMENT FOR TRANSVAAL

(Special to the Bulletin)
 London, Aug. 1.—The proposed law granting constitutional government to the Transvaal was introduced in the House of Commons today. The measure is regarded as the most important piece of constructive legislation placed in parliament for some time. The new law will make the Transvaal as free as Canada. The crux of the question raised by the bill however is whether Britain or the Boers shall be supreme in the Transvaal. If ordinary procedure is followed the British will have majorities in the cities, but the Boers will be able to carry enough of the country districts to give them control of the legislature.

LACROSSE GAMES.
 (Special to the Bulletin)
 Winnipeg, July 30.—Lacrosse: Cornwall 5, Capitals 4; National 8, Toronto 4.

STEWART'S CUP

(Special to the Bulletin)
 London, Aug. 1.—The Stewart's cup race was run at Newmarket today six furlongs. Rocketeer at 5 to 1 was first, Twelfth at 7 to 1 was second, and Admittable Crichton at 100 to 6, third. Thirteen horses ran.

NEW TELEGRAPH OFFICES.

The C. P. R. telegraph operators this morning vacated their old stand next door to the Bulletin and are now settled in the new offices on Jasper, next the Garriep block. The telegraph offices will occupy the centre portion of the offices, the portion to the right being occupied by the Dominion Express Co. On the left will be situated the freight and ticket offices. The old telegraph offices next the Bulletin will be utilized as a Government telegraph station.

BRITISH IMMIGRATION RETURNS

(Special to the Bulletin)
 London, Aug. 1.—According to the board of trade figures the immigrants who went to Canada this season up to the end of July were 19,000. From Scotland there were 7,144, England 3,867. May was the biggest month and April next. By population Scotland sent one for every 28, England one for every 400, and Ireland one for every 1,151. Scotland sent twice as many as England and five times as many as Ireland. Emigration from Scotland has increased 100 per cent in three years.

THE GOOD EARTH.

(Charles G. D. Roberts, in the Outlook, New York.)
 The smell of burning weeds
 Upon the twilight air;
 The poignant call of frogs
 From meadows wet and bare;
 A presence in the wood
 And in my blood a stir,
 In all the ardent earth
 No failure or demur.

O Spring wind, sweet with love
 And tender with desire,
 Pour into veins of mine
 Your pure impassioned fire!

O waters, running free
 With full, exultant song,
 Give me, for outworn dream,
 Life that is clean and strong!

O good earth, warm with youth,
 My childhood heart renew;
 Make me elate, sincere,
 Simple, and glad, as you!

O springing things of green,
 O winging things of bloom,
 O winging things of air,
 Your lordship now resume!

REVOLUTION IN RUSSIA GROWING MORE TURBULENT

DOWN FROM THE NORTH

F. Brick In From Peace River—Conditions in the North.

Fred Brick, brother of A. L. Brick, M. P. P. who is in the employ of Revillon Bros. in the north, arrived from Peace River last evening, and is staying at the Imperial. He was accompanied on the trip in by Corporal Bowler and Constable Stand, of the Mounted Police, who came down from Fort St. John, B.C. These men were members of a party of thirty mounted police, who were engaged in cutting the trail from Teasin Lake to Fort St. John, a distance of six hundred miles. This trail is a portion of the Yukon-Peace River road, which is now being cut through. The remainder of the party at Fort St. John are now working toward Fort Graham, and when Corp. Bowler and Constable Stand left, they had reached a point two hundred miles from Fort St. John. The party expects to arrive in Fort Graham this month.

The work of cutting the trail is difficult, as the country traversed is very rocky and hilly. The men work from seven in the morning until five in the evening, camping at intervals along the route.

OFF FOR EDMONTON

(Special to the Bulletin)
 Winnipeg, July 31.—Twenty-four manacled convicts were taken from the Stony Mountain penitentiary this morning and placed on a C. P. R. train to be taken to Edmonton and confined in the new penitentiary recently completed in the Alberta capital. The car was specially fitted for the prisoners, all of whom were sent by the North West Territory courts to Manitoba during the past few years. The cost of their keeping has been provided by the territorial government, but in future this will cease as there is plenty of room in the new penitentiary for all who will be sentenced in Alberta during the next few years. The car was heavily barricaded on the outside, and Col. Irvin, warden, and several guards were in charge.

DECLARED NOT GUILTY

(Special to the Bulletin)
 Prince Albert, Sask., Aug. 1.—The jury last night brought in a verdict of not guilty in the case of the Indian Jumb, charged with the murder of another Indian, Isaac Michael. The two had been out on a lumber drive in April, and were drinking with others around the camp fire. Deceased and Jumb had a fight, but the evidence did not show that he had struck the blow which caused death.

PRESERVING FRUITS

Are now arriving in due season. Ladies should bear in mind that this is an off season for nearly all kinds of B. C. Fruit, so that the supply is very limited, and to ensure an assortment orders should be placed early to avoid disappointment.

Blackberries

Are now arriving fresh every day, and

Early Crawford PEACHES

will be along in a few days. All fruit guaranteed at

Hallier & Aldridge's
 Fruiterers and Confectioners

Garrison Mutinies, Kills Officers and Takes Possession of a Town

(Special to the Bulletin)

St. Petersburg, Aug. 1.—Advices were received from the war office last evening that during the day the entire garrison in military post at Desplagarin, Caucasus, had mutinied and killed the commander and officers and taken the military administration into their own hands. After organizing the soldiers invaded the town and took charge of the municipal administration. They posted pickets in the streets to insure preservation of order.

Heligoland, Aug. 1.—After desperate fighting last evening saw the climax and conclusion of the mutiny by engineers and artillery men in the Svaagborg fortress. Loyal infantry men stationed in the barracks at Skitviken finally succeeded in suppressing the mutineers. The mutinous soldiers were eventually at the expense of many lives in their own ranks as well as among those who attacked them disarmed and thrown into dungeons within the fortress.

Heligoland, Aug. 1.—The most serious mutiny within the Russian Empire since the dissolution of Douma occurred today at the Svaagborg fortress which guards this harbor. Both soldiers in the garrison and the sailors of the fleet in port are affected. The garrison of the fortress mutinied and the older troops were called out to quell the mutineers. Although a fight ensued the mutineers succeeded in seizing the

THE GAME LAWS OF ALBERTA.

Full Text of the Act Respecting Game as Amended at the Recent Session of the Legislature.

An Act to amend Chapter 29 of the Ordinances of the North-West Territories, 1903, Second Session, intitled "An Ordinance for the Protection of Game."

(Assented to May 9, 1906.)

HIS MAJESTY, by and with the advice and consent of the Legislative Assembly of the Province of Alberta, enacts as follows:

1. Subsection 4 of section 4 of Chapter 29 of the Ordinances of the North-West Territories, 1903, second session, as the same is amended by section 2 of Chapter 12 of the Ordinances of 1904, is hereby repealed and the following subsection is substituted therefor: "Any of the deer family, whether known as caribou, moose, elk, wapiti, deer or otherwise, between the fifteenth day of December and the first day of November in the following year and in any event not more than one animal of any one species of such family."

2. Subsection 5 of section 4 of the said Ordinance is hereby repealed.

3. Subsection 1 of section 5 of the said Ordinance, as the same is amended by section 2 of Chapter 12 of the Ordinances of 1904, is hereby repealed and the following subsection is substituted therefor: "Any bird of those species of the family Anatidae, commonly known as ducks, geese and swans, between the first day of January and the twenty-third day of August."

4. Section 11 of the said Ordinance is hereby amended by adding the following provision:

Provided however that this section shall not apply to persons having in their possession any of the birds of those species of the family Anatidae commonly known as ducks, geese and swans, between the first day of January and the first day of March.

5. Section 16 of the said Ordinance is struck out and the following substituted therefor:

"16. No dog or dogs shall be used by any person or persons to hunt big game and no owner of a dog accustomed to pursue big game shall allow such dog to run at large in any locality where big game are usually found when such game are protected by this Ordinance and any dog found running big game during the time they are protected by this Ordinance may be killed by any person without incurring any liability therefor."

GAME PRESERVE.

6. The said Ordinance is hereby amended by inserting a new section as follows:

"21a. The Dominion Government having set aside sections 13, 14, 15, 22, 23, 24, 25, 26, 27, 34, 35 and 36 in Township 54, Range 20, and Sections 18, 19, 30 and 31 in Township 54, Range 19, all west of the Fourth Meridian, as a deer park for the preservation of game, the same is hereby declared a game preserve and it shall be unlawful for any person or persons to shoot at, wound or kill any game in or on any portion of the said preserve and any person found on the preserve carrying firearms shall be guilty of an offence and shall be punishable on summary conviction before a justice of the peace with a fine of not less than \$50.00 and not more than \$200.00 with costs, such fine to be paid into the general revenue fund of the Province."

(2) Any person who injures, damages or destroys the fence enclosing the said deer park or game preserve or any person other than a game guardian found within the fence around said park and carrying a gun or other firearm shall be guilty of an offence and punishable as provided for in this section.

7. Section 22 of the said Ordinance is hereby amended by inserting after the word "Ordinance," where it occurs in the first and second lines thereof, the words, "except as herein provided for."

8. The said Ordinance is hereby further amended by adding the following new section after section 28:

"28a. With the exception of the provisions relating to elk, buffalo and beaver, the provisions of this Ordinance shall not apply to that portion of the Province lying to the north of the fifty-fifth parallel of latitude."

THE DOUMA'S APPEAL.

The text of the appeal to the army and navy adopted by the radical groups of the outlawed parliament in conjunction with the central committee of the proletarian organizations, is in part as follows:

Soldiers and sailors: The government has by imperial command dissolved parliament and troops have been assembled from all sides to oppress the people by armed force. The people's representatives were elected from among your fathers and brothers, in order to live before the emperor the needs of the people, and to obtain land and liberty, but the emperor would not listen to the elected people. He hearkened to his former counselors, the grand dukes, ministers, generals and the wealthiest of the land-owners, who did not want to give up their lands, their properties, their emoluments and their irresponsible power.

Russia is now divided into two parts. On one side is the vast majority, all the peasants, workmen and all the poor and oppressed, the best educated and the most enlightened citizens, the soldiers who see the most clearly, the best officers and all the martyrs in exile, including many thousands of soldiers and sailors. On the other hand is a collection of oppressors such as Trepoff and Bobiostoff, and the Manchurian general who ran away from the Japanese, but who fired on the people at Moscow and Odessa and Thita, the petty government officials, the police spies

and the whole black hundreds who rely on your strength to beat down the whole Russian people.

"Will you shoot the people, shed the blood of the people, and transfix the people's breast with bayonets? Remember that you are the children of the peasants, that you are the children of the Russian people and at the same time in the villages where you were born, your own brothers who remain are also demanding land and liberty and that the government is sending other troops to shoot and beat them."

"Soldiers and sailors, we, the legally elected representatives of the peasants and workmen, declare to you that without parliament the government is illegal. Orders which it may issue have no legal force. We call on you to cease to obey the illegal government, and actively to oppose it in conjunction with us and the whole of the poor population. You have taken an oath to defend the fatherland. Stand beside us for land and liberty."

"Soldiers and sailors, your sacred duty is to free the Russian people from the treacherous government, and defend parliament. Every man falling in this holy war will cover himself with eternal fame, and the Russian people will bless his name. In this struggle your elected representatives will be with you. Be brave for the fatherland, for the people and for the land and liberty against the criminal government."

Revolution in Russia Growing More Turbulent

(Continued from Page One)

fortress. The sailors on the warships in harbor took sides with the mutineers and refused to fire on the disaffected soldiers who now control the fort. The privates from the Finnish red guards have proclaimed a general strike and have gone into the provinces to stir up the people to obey the orders for a strike.

Later: The ships are now taking part in the fighting and are bombarding the fortress. The reports of cannon can be heard for miles. Inhabitants of the city and surrounding country are fleeing.

The mutiny began among the sappers and miners at Veahovon depot last night. In the early morning there was a recurrence of trouble when the mutineers made prisoners of the officers and elected their leaders to take the place of the deposed officers. The mutineers rowed the boats and naval arsenal. The Russian torpedo boat destroyer Flin, is bombarding the barracks. One officer has been killed and one wounded by mutineers. Boats are being sent from the shore to bring away the wounded during the fighting.

Paris, Aug. 1.—The Matin prints an Odessa despatch which says it is reported from Lovada that the Czar's palace there is in flames as a result of acts of revolutionaries.

Stockholm, Aug. 1.—A Helingfors despatch states that the artillerymen joined the Svaborg mutineers but the infantry remained loyal. The artillery trained guns on the loyal troops, five hundred of whom were killed or wounded.

NOTICE

THE LIQUOR LICENSE ORDINANCE

PROVINCIAL OF ALBERTA
The following applications will be considered at a meeting of the license Commissioners to be held at Edmonton on Tuesday, August 28th, 1906, at 3 o'clock, p.m.:

City News

LOCAL

—Lacrosse practice this evening on Second street grounds.

—The weekly list of accounts passed by the city council last evening amounted to \$12,627.23.

The financial statement and auditor's report of the city of Edmonton for last year has been issued.

—Armstrong and Snow is the name of a new firm of contractors who have opened offices at 133 Rice street.

—The Edmonton Pactorium has been removed from their old stand next the Mariaggi cafe, to the old stand of the Cross Panatorium.

—By an error yesterday the name of Mrs. J. M. Taylor, honorary president of the W.M.S. of the Presbyterian church was omitted from the list of officers.

—J. J. Caashin, of Orillia, Ont., the newly appointed accountant of the Edmonton Penitentiary, arrived in the city last evening, and will take up his duties at once.

—Miss Robinson, of the Women's Home Missionary Society, who lectured in the First Presbyterian church on Monday afternoon, will also lecture this evening in Queen's avenue church.

—P. Wagner returned on Monday from a trip to Saddle Lake. Crops in that district are very promising and well advanced and harvest will be general in a few days.

—The contractor for building the Normal school in Calgary was awarded yesterday to the British Columbia Contracting Co., who are operating in Alberta for \$123,300.

—The corner stone of the new German Lutheran church, two miles west of Spruce Grove post office was laid today. The church will be a commodious frame structure on a stone foundation.

—Extensive improvements are in progress in McDougall church. A new gallery is being erected at the rear of the church. The contractor is Mr. J. W. Cotter.

—Last night about 11 o'clock a steer belonging to the Vogel Meat Packing Company became infuriated while being driven down Jasper avenue and ran into the plate glass window of Lundy and Macleod's hardware store breaking it into souvenir pieces.

—Workmen are engaged today in laying a plank crossing opposite the Bon Ton, which will be a great convenience to street-goers. We also might remark that now since the dry season is with us we are to have a crossing at the Junction of Jasper and Howard, Thanks.

—The log building behind the Edmonton hotel has been removed. This was one of the oldest buildings in Edmonton, having been erected by Mr. Donald Ross over thirty-two years ago. The rafters were put on by Mr. Ross and Mr. Lang on the 9th day of September, 1874.

—The new bill this week at the Empire includes some very interesting moving pictures, full of life and ginger. rol. Lewis, the cornet soloist, plays a pleasing medley of popular airs, and Watts Greys sings the illustrated song with good effect. The show is clean and all right for the money.

—Calgary Albertan: Evidently the dog has not been heard of the gang of pickpockets who operated on the north line and in Calgary a short time ago. Mr. Gilbert, of Toronto, was travelling from the north last Thursday night, when the conductor asked him for his fare, but pocket book, cheque book, and letters had all gone. The conductor began to get impatient and talked of stopping the train and ejecting Mr. Gilbert onto the bald-headed prairie. Gilbert objected and, finding a friend asked him for the fare. His friend consented, only to find that he had been looted also in the same way. Fortunately he had some loose change, and the situation was saved. But this is very fierce.

—Calgary Herald: Hon. A. C. Ruthenford, Premier of Alberta, arrived from the north last night, and leaves for Banff this afternoon. He will spend a couple of days in the park, returning to Calgary in time to participate in the parliamentary excursion which starts on Tuesday morning. The premier visited the site of the new provincial normal school this morning, in company with P. Burns, Principal Bryan and J. J. Young, and also inspected the magnificent new bridge which is just being completed over the Bow. The party then motored over the hills north of the city and admired the fine view from Mount Pleasant. While in the city the Premier in his capacity as Minister of Education, completed the agreement with the school board in regard to the new normal school.

GOSPEL MEETINGS

(Contributed)

The large audience that gathered at the Gospel tent Sunday evening listened to what developed to be a very interesting study on "The Judgment". The speaker likened it to a court in session, with judge, advocate, and prosecuting attorney. God as the judge, Christ Jesus as advocate and Satan the accuser of the brethren.

From Dan. 7 and Rev. 20 it was shown that Heaven has a system of bookkeeping. The book of life in which the names of all who have accepted pardon through the merits of the Saviour's blood are written, and a book of remembrance in which is recorded the life record of each individual from Adam to the end of time. At the time of the judgment all are judged out of the books. When a case comes up the record is read and in behalf of the one pleads his blood in behalf of the guilty sinner. If it was found that the one had confessed his sins and found pardon the words "not guilty" were spoken and his name retained on the book of life. On the other hand if an individual failed to accept the sacrifice made in his stead he was cut off and would find no inheritance in the promised land.

From Matt. 18-10 and Heb. 1-14 it was seen that each person has an attendant angel who keeps a record of all a man's wanderings. So in the final judgment the Father is assisted by an innumerable number of angels. Everything has been done by an infinite God to make this an occasion where only justice, equity, love and mercy will be seen in every sentence. The meetings will continue each evening this week. The subject for Wednesday is Prophecy; The great image of Daniel (2nd chap.) Thursday: The four great beasts of Daniel (7th Chap) their meanings.

EDMONTON'S SHOWING

While the census returns published yesterday are subject to final revision and correction it is improbable that they will be materially changed and they may be taken as substantially representing the population of the cities and towns of Alberta.

Edmonton people have good cause for gratification in the showing made by their city. To the residents it has been clear from a thousand signs that Edmonton has been growing with remarkable rapidity during the past five years and while there were those as in every town whose imaginations outran their judgment the consensus of opinion was that the present population numbered somewhere between 10,000 and 12,000 people. The returns therefore not only bear splendid testimony to the progress made by the city but they are devoid of the disappointment which they must bring to those communities whose people have been indulging in exaggerated expectations. It is gratifying to know that Edmonton has grown so rapidly; it is also gratifying to know that Edmonton people have not been given over to vain imaginings in estimating the rapidity of that growth.

A city which has more than doubled its population twice within five years is making rapid progress, a progress which must prove the forerunner to a re-action to any city not founded solidly on the merits of its tributary country. A "mushroom" city which advanced at such rate must quickly reach the zenith of its transient glory. But Edmonton is not a "mushroom" city. That some of the unhealthy elements of a boom have invaded Edmonton in common with all other western cities is true but such of the "boom" feature as we have is the result and not the cause of our real progress. That progress is due to the public recognition of the fact that we have a country of resources and a city of opportunities.

So far from being premature the present development of Edmonton is twenty years belated. Twenty years ago the prospects of Edmonton were nearly as bright as they are today. With the prospect of a transcontinental railway almost past their doors the pioneers then dreamed of the greatness to come to the city. That it did not come as quickly as expected was the fault neither of the city, the country nor the pioneers but of the mistaken policy which kept the West a wilderness by refusing it the means of transportation. This policy has fortunately been abandoned, and given the opportunities to which she is

entitled and which she was so long denied, Edmonton is rising to take her place among the great industrial, commercial and residential centres of the Dominion. That her rise is rapid is the result less of anticipation than of long delayed realization.

THE EXCLUSION OF UNDESIRABLES

Several British papers comment unfavorably on the restrictive clauses of the new Canadian Immigration Act. The Yorkshire Post advances the doctrine that while we have a perfect right to exclude aliens it is a different matter to exclude undesirables from our own race and nationality, and adds a protest against the idea that Britain, while bearing all the naval burdens of the Empire has no rights outside Great Britain itself. The unanswerable reply of Canadians will be that undesirables are undesirable no matter whence they come and as such cannot with safety be given admission to this country. The ideal of Canadian nationality regards quality as well as quantity and this country is not disposed to admit knowingly elements which can contribute nothing to the accomplishment of that ideal. As to the "rights" of the matter a country boasting any measure of national liberty has surely the moral right and hence has or should have the legal right, to refuse admission to those who have proven themselves unworthy or incapable of citizenship elsewhere.

Canadians will not admit for themselves and do not believe that the British people hold, that the rights of Great Britain include the privilege of making Canada a dumping ground for the residue of British social and industrial conditions.

THE PROMISE OF A "BUMPER" CROP

A grain crop is a certainty only after it is threshed but the crops are now generally well enough advanced to reasonably indicate the harvest which may be expected. Reports from all sections of the west tell of splendid fields of grain well advanced and the general outlook for a bountiful harvest was never brighter at this period of the season. Already reports of early cutting are coming from some sections and should favorable weather continue in a fortnight the hum of the binder should be the prevailing sound from the Great Lakes to Alberta. The present promises are that the yield will at least reach the average, while the increase in acreage should swamp all previous records of the aggregate western crop.

There is rarely a day without a cloud and the generally optimistic outlook is marred here and there by reports of damage. Early in the season cut worms appeared in several sections in Northern Alberta and Saskatchewan and crops on the fields visited by them will probably return only fodder. A hail storm visited the Indian Head country last week and destroyed 8,000 acres of wheat, while minor storms have doubtless damaged smaller areas in all three provinces. There are reports of red rust from points in Manitoba. It is claimed that one at least of these reports has been unduly exaggerated by a milling company supposedly interested in discounting the generally favorable prospect. However, this may be the damage affect limited areas and while discouraging to the individual sufferers will have no appreciable effect either on the business of the country or on the record which the West promises to make for the year 1906.

The Manchester House

(ESTABLISHED 1888)

Blankets, Quilts, Sheetings, Etc.

We have just received and placed in stock one full range of Blankets, Quilts, Bed Spreads, Pillows, Pillow Cases, Etc., and as we bought in large quantities, and always for cash, we are in a better position than ever before, to give our customers the very best value for their money. An inspection of our new stock will convince the most careful buyer.

GRAY WOOL BLANKETS
Weight 6 lbs, size 66 by 76, per pair, \$2.25.

GRAY WOOL BLANKETS
Fine gray wool blankets 6, to 10 lbs. in weight, \$2.75 to \$7.00 per pair.

WHITE WOOL BLANKETS
A special in a fine soft white wool blanket, sizes 64 by 94. This blanket is very extra value at \$4.50 per pair.

FLANNELETTE BLANKETS
The very best quality \$1.25 and \$1.60 per pair.

CRIB QUILTS
Children's white crib quilts 65c and 75c each.

BLEACHED SHEETING
7-4 single bed width, 30c per yard.

Every cook should try

Blue Ribbon

BAKING POWDER.

It is full strength. Pure and wholesome

Inferior powders are apt to contain low-grade or even adulterated ingredients, and every impurity interferes with the proper action of the powder.

But Blue Ribbon Baking Powder contains only the highest grade of pure materials, refined till the last little trace of impurity disappears. So you get the full benefit of its great strength, and every pound is exactly the same.

The result is a steady, even action in the "rising" process, which makes the biscuit or cake not only light and dainty, but of a nice, even texture throughout.

Perfect digestion is the natural result, for as the food is eaten, the light, even texture makes it easy for the digestive juices to mix all through, and act on every particle. The food is wholesome as well as light. Sold by the best grocers, 25c. a pound.

1906	-	-	11,534
1911	-	-	?

At the same ratio of increase for the next five years 40,000 will be the population of Edmonton in 1911.

Is there any reason to suppose the same ratio of increase will be kept up? WE HAVE ONLY BEGUN TO GROW. Railroads are just beginning to come; manufacturers are just beginning to realize the splendid opportunities there are in this city and wholesalers are just awaking to the fact that here is a fine distributing centre. We have only been playing at coal mining, and farming in the surrounding district is practically only in its infancy. In five years these industries will all have made gigantic strides, and there is every reason to suppose that the population will keep pace. HOW DOES THIS AFFECT YOU?

Are you going to stand still, or are you going to keep up in the race? Lots which look some distance out to-day will be close in, in five years. They cost from \$100 to \$200 to-day; they will be worth \$1000 then. Are you going to get your share of the advance? You cannot get it by standing aside and looking on. Invest now and let your money work for you. Lots in

WESTMOUNT

Are selling today from \$100 to \$250.

This is Edmonton's very finest western suburb, lying right between the West End City Park and the Western Boundary of the city. No better buying anywhere. The terms are easy, only one-third cash, one and two years for the balance. Investigate to-day. Delays are hazardous.

LEDUC FAIR NEXT MONTH

Exhibition Will Be Held By Leduc
Agricultural Association

The first fair under the auspices of the Leduc Agricultural Society will be held on Tuesday, Aug. 21st.

The officials of the fair are:
Honorary president—T. T. Telford, M.P.P.

President—Dr. Baker.
First vice-president—R. Fetherstonhaugh.

Second vice-president—Jas. Mundy.
Secretary—S. G. Tobin.

Treasurer—E. Lee.
Directors—K. Martin, W. Brunelle, Jas. Smith, E. Buckell, P. J. Mullen, J. Murray, J. Hammer, M. Rodgers, J. Stubbs, A. Kuhn, P. Reynolds, G. L. Simpkins, J. Hickey, G. Gressel, T. A. Norris, C. W. Gaetz, J. Pyren, C. Mortimer.

Superintendents in charge—Horses, W. Brunelle; cattle, T. Buckell; sheep, G. L. Simpkins; swine, J. Hammer; poultry, G. Gressel; dairy and agricultural products, James Smith; machinery and agricultural implements, C. W. Gaetz; speeding, K. Martin; domestic and art department, T. A. Norris.

The sports begin at 9:30 a.m. with a baseball match, Millet vs. Leduc, first prize \$15.00; 2nd, \$5.

The aquatic sports include: 11 a.m. canoe race, single, quarter mile with turn, first prize \$2, 2nd \$1.

Canoe race, double, quarter mile with turn, first \$3, 2nd \$1.

Canoe race, triples, quarter mile with turn (3 in canoe) first \$4, 2nd \$2.

The speed events begin at 1:30 p.m. and include: Half mile dash, open; best two in three; four to enter and three to start; 1st prize \$12, 2nd, \$6; 3rd, \$4. Entrance fee, \$2.

Boys' race, boys 14 or under; owners up; ponies 14 hands or under, local. 1st prize \$6, 2nd \$4, 3rd \$2; entrance free.

Relay race, open, 1-2 mile, start, run 1-8 mile, unsaddle, saddle, run to 1-4 mile post, and back to starting point; owners up, four to enter, three to start. 1st \$12, 2nd \$6, 3rd \$4; entrance fee \$2.

There will be also a lengthy program of athletic events.

The prize list includes horses, cattle, sheep, swine, poultry, dairy products, grains and grasses, vegetables and roots, ladies' work and educational exhibits.

EDISON NEWS (Correspondence)

Edison, July 29.—The work on the new government road between Chandler and Mills is progressing very rapidly under the able management of Jack Edgson.

Alex McGregor has started to teach the east end school. Mr. McGregor is a splendid teacher, and we are glad to have him back in the settlement.

Mr. Woodcock has had the bad luck to lose some very fine horses.

Jack Edgson has been appointed local government land agent, which will be of great convenience to the settlers.

Mr. Allen's big new barn is nearly finished.

McGinnis & Lyons have got a gang of men up here cutting hay for us; at their sawmill here next winter.

The Edison annual picnic is coming off on the 9th of August. As usual a good time is expected. All friends are invited.

One of our new settlers, Mr. Gibson, from Ontario, is improving his big farm very rapidly.

The Edison grain crops are ten days ahead of anything between here and Edmonton.

The outlook is for a better crop than any we have had before.

Mrs. Lambert and daughter of Edmonton, are visiting with friends in the settlement.

Mr. Arthur Edgson has just brought into the settlement a very nice span of horses.

BORING FOR OIL AT MEDICINE HAT

(Special to the Bulletin)
Medicine Hat, Alb., July 31.—The Canadian Pacific Railroad is starting at this point one of the greatest undertakings in Western Canada. The company will make a test to determine whether there is oil under the natural gas here. Last week nine car loads of modern oil drilling machinery arrived here, consisting of a modern cable rigged drilling outfit and drill pipes of various diameters sufficient to reach to a depth of 3,500 feet. The greatest depth reached yet in this district is 1,816 feet, and the supposition is that an oil bed exists under the gas. The company will spare no expense to determine whether or not oil exists here, the operations being under the charge of Eugene Coste.

May Enter Action Against City for Damages

(Continued from Page One)

law did not know much about gasoline. The matter was referred to the police and license committees with the solicitor to make the necessary amendments.

When the communications came up for attention, on the top of the pile was one from the law firm of Bown, Dawson, McDonald & Hyndman, on behalf of William Asher. Mr. Asher was seeking for settlement of damages claimed by him because of the death of his son Bernard Asher, in the isolation hospital, and wished to know if the city were open to negotiations with a view to settlement. If not, then the city solicitor was to be prepared to accept the service of a writ for damages. The communication was referred to the solicitor and commissioners.

Another sequel to the hospital inquiry, was a letter from Dr. McGibbon, with a request for the city to come forth with the \$250 counsel fees during the inquiry, which the learned judge in the inquiry had requested the city to pay. Dr. McGibbon said in his letter that it was not right that he should bear the expense altogether in a matter that was for the protection of the public, while the city was paying a solicitor in their defence. The letter was filed on motion.

Dr. Forin was another who was interested in a pecuniary way in the inquiry. He had before the council a bill which read as follows:

"To two days preparing expert evidence

"To two days giving expert evidence in court

"Total

"Receipt of \$5 acknowledged."

Ald. Bellamy said he understood an arrangement which had the sanction of the commissioners had been made between Dr. Braithwaite and Dr. Forin regarding expert evidence, and on that understanding he seconded the motion of Ald. Smith that the amount be paid. Ald. Griesbach said that ordinary witness fees were \$1 per day. Expert evidence fees were \$5 per day, he thought that the \$5 which had been paid to Dr. Forin covered everything. The motion carried, Aldermen Griesbach and Picard voted in opposition.

The long-talked of extension of Jasper avenue through the Government reserve property in the east end was once more brought up in the council, when a letter regarding the matter was read from Hon. Frank Oliver. The letter enclosed a communication from the Minister of Justice to the Minister of the Interior, the substance of which was that the road allowance through the government reserve would be granted the city, provided that a bridge be built across the gully on the reserve in direct line with Jasper avenue, and that the bridge be built to allow a road and track to pass underneath. The letter also in a diplomatically worded manner, asked that the city re-convey to the government that strip of twenty-five acres north of the gaol building and the present line of the Canadian Northern Railway, which had been passed over to the city with the understanding that the C. N. R. would build its station on the property. The C. N. R. line was now laid but the station had not been built on the property. The railway cuts diagonally across the government property and close to the gas works. The Minister of Justice in his communication, made the request that the city should re-convey this property to the Government on consideration of the granting of the right of way for the Jasper extension.

The communications were filed on motion of Ald. Griesbach.

J. S. Hall of the Alberta Union of Municipalities, wrote requesting that the city pay the membership fee which was charged at the rate of \$2.00 for every 1,000 population. The amount \$22, was ordered paid.

The Burroughs's adding machine Co. placed in the city offices an adding machine on approval. The commissioners recommended its purchase at a cost of \$3.75. The council adopted their recommendation.

The C.N.R. had a kick coming about their taxes for 1905, they had been taxed \$544 on an assessment of \$34,000. The company claimed that they had not been billed for taxes according to the terms of the agreement, which provided that they be exempt from taxes save school taxes, for five years from the time the main line was laid. The claim was referred to the solicitor to report.

Regarding the tests being made at the exhibition grounds for the discovery of coal seams, a letter was received from Short, Cross and Biggar to the effect that the tests had resulted in the finding of two seams of coal, one one eight feet and the other nine feet. The commissioners recommended that the services of Mr. Pierce, well digger, be secured for the purpose of sinking a shaft on the tests. The cost of sinking the shaft would be for the first 100 feet, \$1.50 per foot, for the next 100 feet, \$2.50 per foot, another 50 feet for \$3 per foot. The recommendation was adopted on the motion of Aldermen Picard and Griesbach.

A petition for an arc light at the corner of Athabasca and Eighth was granted. Alderman Picard suggested the need of electric lights in

the north end of the city and suggested that the lights be extended along Kinslino avenue, to the creek. His suggestion was adopted in conjunction of the granting of the petition.

Petition for sidewalks grading, etc., were granted as follows:

A 16-foot walk on Kinslino from Sutherland to Ross.

Grading Thirteenth street from Victoria to the hill.

Grading Stewart street through the Stewart and Milne properties.

A walk on Eighth street from Jasper to Athabasca.

A petition for grading and sidewalks together with water and sewer connection on Thirteenth street from Jasper to Athabasca was the subject of discussion and controversy. Alderman Bellamy thought it would be a useless expense to put in water connections if there were only two or three residents on the street, while Alderman Manson thought that for the sake of fire protection alone the connection should be made. The petition was left with the city engineer to report.

The date for the court of appeal and the court of revision was set for Aug. 27th.

The purchase of a new fire ladder truck for the city fire hall has been under consideration for some time and last night prices were quoted from the Seagrave Co. for a city ladder truck for \$3425. The truck weighs 500 lbs. and has an extension ladder of 65 feet together with smaller ladders. The ladder was raised by hand. Chief Davidson, who was present said that while an aerial truck was faster in operation a truck such as the one specified would always be a necessity. On motion of Aldermen Picard and Manson, the recommendation and report of the commissioners was adopted.

The commissioners recommended the letting of the contract for boulevarding and grading Seventh street and Hardy street from Sixth to Eighth street to Mr. McVich at a cost of \$4,500.

Alderman Calhoun took the opportunity of the first jull in business to renew for about the fourth time his notice of motion: "That in the opinion of this council J. H. Hargreaves, commissioner of public works, should be asked for his resignation."

The following extension of pound limits were adopted. Starting from the river at the intersection of Government avenue thence north to Rat Creek, thence west to First, thence south to Churchill thence west to Sixteenth, thence south to the river, and along the river to the point of commencement. Also that portion of River lot 20 lying south of the Goal property.

Commissioner Kinnaird was unanimously granted a fortnight's leave of absence.

SPORTS

THREE DAYS OF AMERICAN BALL

When the Americans, college ball team from Seattle, and champions of the state of Washington, arrive tomorrow, there will be doings in the capital. The champion Americans have been in the south doing up the Calgary ranchers with close games, and they expect to have a still more interesting time of it when they meet the Capitals on the second street diamond for their first game on Thursday.

The bunch that now represents Edmonton colors can play ball some. They have at last a nine that can get right along with the Yankee bunch, they will be there with all the goods necessary. A big crowd will line the bleachers on Thursday evening, and evenings following. The record made at Alberta's first provincial fair will not be in it when the ticket \$m-10 come to chalk up the attendance during the three days our American friends will appear on the diamond. The Capitals have all the material they want, three good pitchers, and a bunch of over-the-hillers, the chief of whom is Sullivan.

FIRST LEAGUE GAME

Edmonton and Strathcona football teams meet this evening on Strathcona exhibition grounds for the first game in the Alberta football league. Edmonton will have the strongest bunch in the field that they can get together, and it will be a game of battle from the drop of the hat. Edmonton stands a splendid chance of landing the championship of the province this year. The return game between the Capitals and Strathcona will be played next week on Edmonton grounds, and will be the deciding game of this district, there being only the two teams to play.

EDMONTON AGAIN WINS

The Strathcona ball team is now a back number with the Capitals. The team clearly proven, last evening when the Capitals crossed the river and put it over them by five runs to zero. The Strathcona old-timers couldn't do a thing with the new hitters of the Capitals, and it was a walk-away cinch for Edmonton. Ten all pitched for the Caps. Only five safe hits were made from him to first, three getting to second and only one to third. The game was as one-sided to be interesting.

FOSTER'S FORECAST

Washington, July 28.—Last bullet in gave forecasts of disturbances to cross continent July 30 to August 3, warm wave 29 to August 3, cool wave August 1 to 5. Next disturbance will reach the Pacific coast about August 3, cross west of Rockies by close of 4, great central valleys 5 to 7, eastern states 8. Warm wave will cross west of Rockies about 3, great central valleys 5, eastern states 7. Cool wave will cross west of Rockies country about 6, great central valleys 8, eastern states 10.

The important feature of this disturbance will be the great rise in temperature it will inaugurate, and the decrease of showers in the drought districts of the great corn producing states.

Among the most severe storms of August will occur as this disturbance crosses the continent, and it will be a good time to avoid excursions on water.

I expect the temperature of August to average much above normal in the Ohio valley, the middle Mississippi and lower Missouri valleys, in the vicinity of the lower lakes and of Lake Michigan and on the Pacific slope. Elsewhere generally below normal temperatures will prevail.

I expect a severe drought in the principal corn sections during August. Draw a line from St. Louis, by way of Dodge City, Omaha, Des Moines, Peoria, Cincinnati, Cairo and back to St. Louis, and within that circle will occur a great drought that will cut down corn crop conditions to 25 per cent below those at the same time last year. Elsewhere rainfall will be from about 100 to 200 per cent above normal, and even within the marked drought section some of the good percentage better than 1935. But farmers should not permit the deceptive pernicious methods of

places will have almost enough rainfall to make a fair corn crop. The corn crop conditions in the southern states will probably continue good and the government crop report as to these reports to decide them. The methods of making these reports, whereby 12 per cent above, on one-tenth of the corn crop—that produced in the southern states—overbalances 10 per cent below on nine-tenths of the corn crop—that produced in the mid-latitude states—of the great central valleys—was made out for June by the government crop reports, should be ridiculed, scorned, exposed by all who believe in competent, honest reports. I shall advise farmers not to sell corn at less than sixty cents, Chicago market.

Wheat Growing in the Canadian West

By the Hon. W. R. Motherwell, Minister of Agriculture, Sask.

Wheat production in Western Canada twenty-five years ago was confined practically to a few pioneer settlements in the Red River valley of Manitoba.

But just as successful wheat culture to the south of us extended westward from the East coast to the Middle States and from thence to the Dakotas and Minnesota during the last half century, so in Western Canada during the past quarter century has a similar expansion westward and northward been steadily going on until the far off Peace River country has come to be recognized as within the scope of successful agriculture in this respect. In the light of these experiences, it is a bold man indeed who will, today, presume to prescribe the limit either in extent of wheat area or exportable surplus of our great Western Empire. Statisticians of more or less accuracy and sources of information have estimated our capacity to grow wheat all the way from two hundred and twenty-five millions to one billion bushels per annum. While the latter figure is doubtless extravagant, moderate and well informed men are of the opinion that an average of these two figures is quite within the range of possibility during the next twenty-five years.

And when one considers the inviolable moderating effect that settlement always seems to have on temperature together with the fact that earlier varieties of wheat are continually being evolved by our painstaking experimenters, the mind fails to grasp the future possibilities of Western Canada as the future granary of the empire.

But I take it that a paper of this nature will be of more interest and greater usefulness if the present methods of wheat production in the west are referred to, together with the leading principles to be observed and dangers to be avoided.

If one is to attain the greatest success in the cultivation of wheat on the western prairie, there are at least three outstanding questions that demand intelligent study and prompt action and these are soil moisture, good seed and weeds.

Taking on the average year and the average prairie, soil moisture is by far the most important question that should engage the active attention of the farmer. Because of this, bare summerfallowing is becoming and indeed, in many parts, has already become the very foundation upon which successful wheat culture is based and profitably carried on. True there are many dissenters from this, but these are invariably from localities where the rainfall is more abundant and fall ploughing has met with a good measure of success.

During the past twenty-five years there has not been sufficient moisture taking one year with another to grow a crop each consecutive year, hence the necessity of stopping every third or fourth year and catching up as it were, with the supply of moisture that can be stored up in the soil during a season of bare fallowing.

The practice of summer fallowing is usually associated in the popular mind with the restoration of fertility, but not so in the west. Conservation of soil moisture is the primary object of bare fallowing.

The destruction of noxious weeds and the putting of large areas of land in good condition of tillage at a season of the year when time is least pressing are, of course, two very important secondary considerations.

With the same aim in view of economizing moisture, all fall and spring ploughing should be harrowed down thereafter as thoroughly and quickly as possible in order to reduce the area of evaporating surface to a minimum and convert the top soil into the fine granular mechanical condition of a non-conductor.

These precautions have a greater and more direct bearing on successful wheat growing in the west than a casual onlooker, unfamiliar with such conditions can possibly imagine. Next in importance comes the too frequently neglected question of good seed up to within one year ago, it is safe to say that seventy-five per cent of western farmers paid no attention whatever to the selection or securing of good seed. In fact, very many deliberately continued from year to year to sow poor, defective seed, under the apparent impression (most erroneous) that it made no difference; and unfortunately on our fertile prairie, with refreshing showers and brilliant skies, quite frequently under favorable conditions, magnificent yields can be gotten from very poor seed indeed. But a continuation of such a mistaken practice could eventually have but one result—the gradual deterioration in both quality and quantity of our staple field product, wheat. During recent years, however, a vigorous campaign, on behalf of better seed and greater care in the selection thereof has had the effect of arresting the turning public attention

in the direction of improved conditions in this respect.

The third most important factor referred to in connection with the growth of this cereal is the absence or presence of noxious weeds. Weeds in the west compel us to be either good farmers or, sooner or later, quit.

In some respects weeds may be looked upon as a necessary evil. The tillage necessary for their eradication would frequently not be forthcoming, with the result that, in many instances, much inferior crops would be grown. But of course it is not necessary to grow weeds in order to have good crops, but it is absolutely necessary to keep down the weeds by cultivation in order to attain the best results.

When the most important question of soil moisture becomes more generally understood (and it is rapidly becoming so), then every weed will be looked upon in its true character of robber—not midnight robber alone, but daylight as well—robbing the moisture and nourishment that should go to succour and develop the growing crop.

In the foregoing, general principles have been dealt with that are more or less applicable to any part of Canada.

The west however, has certain methods in connection with wheat production peculiar only to itself. Owing to the shortness of the summer season, the seed is got in the ground as quickly as possible after the beginning of April, consistent with proper soil conditions for doing good work. Broadcast sowing, so prevalent in the early years has been abandoned altogether. The strong, dry, drifting winds that sometimes prevail in the spring has rendered fairly deep seeding—from 2 to 3 inches—quite necessary. Some sow even deeper than this, with the idea (very mistaken) that deep sowing will enable the crop to better withstand subsequent drought. As wheat is a surface growing plant, it cannot be deceived into being anything else by unnecessarily deep sowing. Besides, very deep sowing is conducive to slower germination and weaker plants—two conditions that we wish to get away from as far as possible. But this early and moderately deep seeding on our rich prairie soil seems to predispose our wheat crop to the attack of that fungus parasitic plant known as smut.

This fortunately can be obviated by carefully treating all seed before sowing, with a solution of either bluestone or formalin. Neglect to take this simple precaution has occasioned much individual loss and disappointment and in the aggregate has amounted to alarming sums to the country. As regards the variety of wheat sown, Red Fife continues to stand out head and shoulders above all competitors. There are, however, some valuable earlier hybrids of this wheat, that may be sown to advantage in rich slow ripening soils and the newer districts.

The germinating properties of all seed grain should be tested before sowing. This is most important, as experience has taught us that a good even, robust "catch" of wheat in the west is half the battle won. The amount to sow per acre is also important. If too little is sown then seedling is encouraged and maturity retarded. If too much, then it will not withstand the drought that frequently comes at one time or another

(Continued on Page Eight)

Why everybody likes Abbey's Salt.

It is so pleasant to the taste that even children take it with pleasure.

It does not "cake" or flake on top of the water.

It effervesces slowly—may be drunk leisurely, without choking or blinding the user like seidlitz powders.

The granules all dissolve—thus the full benefit of the salt is obtained with every dose.

It is the ideal laxative and tonic to purify the blood—regulate stomach, liver, kidneys and bowels—and build up the system.

Abbey's Effer-Salt

25c. and 60c. a bottle.

Wheat Growing in the Canadian West

During the crop growing season. Distinctly differ so much in soil and rainfall, that no hard-and-fast amount of seed per acre can be recommended for the west as a whole. Indeed, individual experience on individual farms is the only safe guide to follow and even then much depends on the particular kind of season that follows. Early autumn frosts and summer drouths, although largely overcome by the effects of settlement and better methods of tillage, are climate conditions still to be feared in some parts of the west. In a locality where the former is feared, then, fairly thick seeding — from 1.5 to 2 bushels per acre — should be practiced to hasten maturity. But in districts where drouth is more to be feared, then, a half bushel less seed per acre will invariably give better results.

Harvesting is an interesting and very anxious time on a western wheat farm. Twenty five years ago our prairie wheat crop was handled very much in accordance with eastern Canadian customs and methods. That is, it was permitted to ripen well, carefully stalked and capped, stacked and allowed to properly sweat before threshing. But during most recent years, the rapidly extending wheat areas, with the consequent scarcity of farm labor has introduced entirely new methods, and more expeditious methods, all of which are necessary in these modern days to handle a bulky and heavy commodity like wheat. Because of the larger acreage to be cut and the tendency of our wheat to shatter if permitted to get fully ripe and hard, wheat is now cut fresher or what is termed, on the green side. Besides advancing the farm work, this has the additional advantage of producing a thin skinned high grade milling wheat.

The stacking is largely done now without capping, partly owing to the difficulty in securing competent labor to do it properly and partly because it takes more time to do it.

Stacking in many localities is also a thing of the past, the threshing being done direct from the stack. There can be no doubt that this latter practice has a slight tendency, especially in the latter part of the season to reduce the high gill edged appearance of our wheat, but the depreciation is considered to be so little that it is much more than offset by saving the laborious task of stacking. Besides it is very difficult to secure good stackers in the rush of the busy harvest, and experience has taught us that under such circumstances, wheat is better in a good stack than in a poorly built stack.

In a short paper of this nature, I can touch but very briefly on some of the more important and salient features of the question under discussion. To do full justice to the subject in all its bearings would involve the writing of a book. Sufficient, however, has been said to draw attention to the principle outstanding features of successful wheat culture in the west, together with the wonderful potentialities of our millions of acres of, as yet, unbroken prairie. When it is remembered that for many years the average yield of wheat in the west has exceeded twenty bushels per acre (last year it was twenty-three) and that the great bulk of our western prairie is yet untouched by hand of man, it is no wonder that statisticians are found busily engaged in figuring out our future possibilities in this respect.

But if we wish to attain and maintain the supremacy that will be ours in the very near future; i.e. the largest exporter of the best hard milling wheat in the world, we must pay due regard in the growing of the article to all those details so essential to the production of a first class product. Seed selection must receive more attention, so must weed eradication, while many are of the opinion that the identity of out wheat in transit might be better preserved.

In the light of all the facts, it is extravagant to suggest that the future of Canada is largely wrapped up in the success of the western wheat fields. No mention has been made of the success that has already been attained in the production of winter wheat, especially in Southern Alberta, but that is a sufficiently large and interesting question in itself to form the subject of a separate address.

NO MORE CHEAP HOGS

Hogs are selling high, but present prices look legitimate. Increased consumption is the factor. Formerly the West ate but little pork; now it is increasing in population and demanding more. Pork is the staple article of food of any army of settlers now rushing westward. Every homesteader buys pork to tide over the non-productive period. Alaskan demand is increasing yearly and while corn belt production has not reached its maximum packers' tactics have been repressive of natural increase. A prominent buyer said yesterday: "More hog growers have got out of the business than have gone into it during the past five years. At least three years will be needed for production to catch up with consumption. A few years ago hogs could be produced at 31-32 live weight; now it costs a cent more increase in labor, farm values and feed being taken into calculation. Cheap hogs, like cheap corn, are a thing of the past." Chicago Live Stock World.

THE BEEF QUESTION

Winnipeg Tribune: Hon. W.T. Finlay, Alberta Minister of Agriculture, who is now in the city, has announced that he will consult with the Manitoba Government with a view of securing its assistance in investigating the all-important beef question, which has agitated the West for the past six months.

It is the intention of the Alberta Government, said Mr. Finlay, to appoint a commission to deal with the question, and, if possible, to secure the co-operation of the Governments of Saskatchewan and Manitoba.

While it is sincerely to be hoped that the Alberta Minister's efforts in Winnipeg will be successful, the prospects are not of the most cheerful kind.

During the greater part of the last session of the Manitoba Legislature, the Tribune brought to the attention of the House the unsatisfactory conditions prevailing in regard to the fat cattle industry. Hundreds of letters from farmers, all complaining of the unreasonably low prices to be obtained, were published in these columns. The Government and members of the Legislature also received hundreds of letters directly, all demanding an investigation and prosecution of the alleged beef trust, or combine. The question was raised in the house and a request for an investigation presented.

In spite of all this agitation, the Government took no action—and when the question was raised in the house by a member of the Opposition, Attorney-General Campbell refused to do anything on the ground that the government did not have time!

This does not make Mr. Finlay's chances of success very bright. Clearly, the Government of Manitoba does not want to take part in an investigation—or at least, up until the time the legislature was prorogued it did not desire to take any such action.

True, since that time the situation has somewhat changed. The Tribune has called the attention of the Dominion government to the question and has caused the sending of hundreds of requests for Federal action to be sent to the Dominion Minister of Agriculture.

If the Manitoba Government takes no action, it is reasonably certain that the Dominion Government will. This will be an announcement to the whole country that the Manitoba Government may now be more inclined to see that the farmers of this province get a square deal.

Without the assistance of the Manitoba Government, the Governments of Saskatchewan and Alberta can accomplish little in removing the injustice—if it be established that a wrong exists. Winnipeg is the headquarters of the fat cattle business in Western Canada—therefore, it is at Winnipeg that any unnatural restraint of trade that may be practiced must be sought.

It any case, Mr. Finlay's action is highly commendable, as it will at least clearly show where our local Government thinks its greatest interests lie.

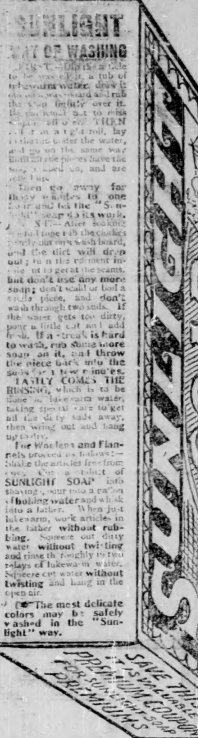

pleased with the west No.1

From "The Farmer's Guide," Huntington, Indiana: About a year ago the editor of The Guide made a five thousand mile trip through Western Canada and published several articles regarding that country. We tried to appear conservative, for to have told the whole truth would make us appear as exaggerating. Since that time several Guide readers have visited that country. Some have bought large tracts of land and others have taken up homesteads. A party has recently returned and among them our friend and neighbor, Dr. D. Yingling, and as he covered a portion of the territory visited by the writer, we have in this issue published a letter from the doctor who corroborates much of what we said a year ago. The doctor is a land owner, having owned lands in the west and northwest and has travelled much. He is thoroughly capable of judging of a country, and while he does not grow enthusiastic over what he sees, comes home very highly pleased with Western Canada, and says we did not tell the half about that country.

"The Farmer's Guide" is edited by Mr. B. T. Bitter, who was here last fall with the Agricultural Editors brought in by Mr. Knappen of the Western Canadian Immigration association.

LEVER BROTHERS LIMITED, TORONTO

The One Right Steel Plate Range

Until we found out just the right way to use asbestos to keep the heat in a cooking range where it must cook the food instead of cooking the cook—every steel-plate range kept the kitchen broiling-hot. This range is a cool range—the top shield and lining is thick asbestos, so the heat stays inside the range and keeps oven evenly hot. Food is better cooked, quicker cooked and cooked for less fuel-cost.

For Cleanly Cooking
OXFORD CHANCELLORS
BURNS WOOD OR COAL

Everything about it is cleanly,—empty the ash-pit without puffing ashes over everything; feed-pouch takes fuel without clutter and muss. Fuel does more cooking because this range has the right draft-control,—sensitive, easily-governed—bring a fire up quick, cool it down quick.

Many styles on view

Who Should Emigrate

(From the Fyfehire Advertiser, Kirkcaldy, Scotland.)
Who Should Emigrate.—The following thoughtful observations, and suggestive notes from a Langtonian, now resident in Winnipeg, have been handed us by Mr. Burt, agent of Canadian government in Kirkcaldy, and will doubtless be read with interest by thousands of our readers, to whom the writer is well known. "After years of constant contact with all kinds of Canadians and association with new arrivals from the motherland, and also with rather unusual opportunities of observation, I am able to say most emphatically that my high estimate of the advantages of this country is in no way diminished. On the contrary, every day strengthens my conviction that this modern Canada is all too little known to our fellow-countrymen, notwithstanding the amount of information in circulation among them. The cute Americans are sharp to recognize the opportunities for business, and to see the extraordinary value of the lands of Western Canada, and are rapidly taking them up, selling off their holdings in the States to do so, and it is sad to think so many of our own kin at home are struggling for a bare existence when the most fertile soil in the world is calling aloud for them to come and claim it. The opportunities for doing business, apart from farming, are multiplying to an extraordinary rate with the settlement of the country, and the development of the railways in all directions is creating a demand for all kinds of work. It is generally admitted that the Scotch make the best settlers, and they are to be found wherever you go in Western Canada. And where you find a Scottish settler you generally find a hard working, one, satisfied with his lot, and very ready to assure you that he has good reason to be so. Any young man or woman, possessed of health and strength, may, by industry, prudence, and thrift, prosper in Canada, which is essentially the young man's and the poor man's country. But my experience has taught me that a word of caution is still wanting to many, however often the subject has been touched upon. It is perfectly astonishing to hear fairly intelligent young people giving expression to their views of Western Canada, even after they have been some time in the country. Everything is criticised, compared with the old country, and ridiculed without mercy, until one begins to think there may be some truth in the saying that the Canadians do not like Englishmen; and small wonder! The Canadians are naturally very like ourselves, many good, bad, and indifferent among them, and new settlers should always remember 'When you are in Rome do as the Romans do.' Conditions of living are, in many respects, quite different from those in Scotland, and it is best to get used to one's surroundings as speedily as possible, when it will be found that everything will go much smoother. Living is generally more expensive, but wages are correspondingly high, and many of the worst grumblers are able to live better and, if they like to save, much more than they could have done in the old country. Of course, in cities, such as Winnipeg, the opportunities of spending money are great, and some of the class here referred to let their earnings slip through their fingers in many foolish ways. Whoever contemplates coming to Canada should make up their minds to be good Canadians from the start, both for their own welfare and for the good of the empire at large. The Canadians are after all our own kith and kin, to a very large extent, and it is a poor return for a loyal Scot to throw dirt at such a magnificent country, where Scotsmen have always taken a leading place and where they have, by general consent, done more

than any other people to create, out of a wilderness, the most productive and the most prosperous colony in the world."

COST OF THE DREADNOUGHT

The first official announcement, respecting the battleship Dreadnought is contained in a White book issued by the British Government. Besides the ten twelve-inch guns announced, the Dreadnought will have twenty-seven twelve-pound quick firing anti-torpedo boat guns and five submerged torpedo tubes. In the arrangement of armament six of the big guns are mounted in pairs on the centre line of the ship and the remainder are mounted in pairs as broadsides. Thus eight twelve-inch guns, or 80 per cent. of the plain armament, can be fired on either broadside, and four possibly six twelve-inch guns, or 60 per cent. can be fired simultaneously ahead or astern. In view of the modern preponderance of torpedo boats and considering especially the chance of a torpedo attack toward the end of a battle the anti-torpedo boat guns are widely separated so that the whole of them cannot be disabled by one heavy shell. Special attention has been paid to protection from submarine explosions.

After thorough consideration from every point of view, the White book states, experts had no difficulty in arriving at a decision to adopt turbines, which are considered more advantageous for sea-going speed, providing sufficient stopping and turning power, and for purposes of quick and easy manoeuvring. The speed is designed to be twenty-one knots. The bunker capacity is 2,700 tons, with which the Dreadnought can steam 5,800 sea miles at economical speed and 3,500 miles at eighteen and a half knots. The estimated cost of the Dreadnought, including guns, is \$8,987,485.

Telegraphic

WINNIPEG BUILDING FIGURES

(Special to the Bulletin)

Winnipeg, Man., July 31.—The value of the building permits issued for new buildings within the city limits since the beginning of the year already amounts to over \$8,000,000 and during the remainder of the season it is expected these figures will be doubled. Several large structures have been planned for which permits will be issued during the next few days, including the union depot to be built by the Canadian Northern, Grand Trunk Pacific and probably the Great Northern.

RAILWAYS PREPARING FOR CROPS

(Special to the Bulletin)

Winnipeg, Man., July 31.—The railway systems running through Winnipeg are now rushing every available car to the wheat belt to handle this year's crop, which promises to beat all records for both quality and quantity. It is expected there will be more grain blockades this year than ever before owing to the large crop, the harvest of which will commence next week. The Canadian Pacific has ordered a large number of box cars to handle the crop and the Canadian Northern has been doing the same for months past.

GAME LAWS VIOLATED ON LAKE WINNIPEG

(Special to the Bulletin)

Winnipeg, Man., July 31.—The fishery and game laws are being openly violated on many of the islands in Lake Winnipeg, and reports received from the north tell of deplorable conditions which exist on some of the islands. On Elk Island the shore is strewn with dead fish, rotting in the sun, contaminating the water and emitting an abominable stench. At C. W. Kennedy's ranch conditions were very similar but Mr. Kennedy put sev-

eral men at work burying the dead fish. In some cases the Indians leave their nets in the water for weeks at a time, with the result that when they eventually pull them out of the water they are filled with decaying fish. The fishery inspectors are now looking into the case, and a number of arrests are expected at any time. A game warden has also left for the north end of the lake, where the Indians are reported to be killing off the moose and elk by hundreds.

NATURAL PAINT DEPOSITS

Vonda, Sask., July 31.—Enormous deposits of natural paint have been discovered some thirteen miles from here on the shores of Houghton Lake. The deposits, which are found in three layers, are of yellow, vermilion and slate and are extensively used by the settlers in the district for painting purposes. The discovery of these deposits was made by Edward Cornsault, of the Dana hotel, who declares the supply is unlimited. Mica and salt are also to be found in the same district in large quantities and a syndicate is now being formed for the purpose of developing the discoveries.

The Semi-ready Spring Style.

Semi-ready Tailoring was not an inspirational discovery. It was an evolution of bright ideas.

To put as good work in Semi-ready \$15 Suits as in their \$35 Suits was an after attainment.

Talks on Orange Meat

(THE PURE FOOD)
Mixing and Flaking.

After the wheat is thoroughly cooked—all starch cells broken—and starch converted into carbohydrates—it goes to the mixing machines. Here, malt is added, which converts the starch into maltose (Malt Sugar), which makes ORANGE MEAT so nutritious and wholesome. Then the malted wheat is passed through special machines, which turn the wheat kernels into individual flakes. Orange Meat is then ready for the ovens, to be baked a deliciously crisp golden brown.

Mercerized paper lining of every package insures Orange Meat being always fresh, and clean. At all grocers in 15c and 25c packages.

Orange Meat

Every 15c package contains a coupon, good for valuable premiums. 25c or "Jumbo" package contains 2½ times the quantity of smaller size. Write "Orange Meat, Kingston" for new premium catalogue.

BUILDING ON THE STREET

At the city council meeting last evening, Alderman Picard brought to the attention of the council, the matter of the additions being made to the Edmonton hotel at the foot of First street which were being built on the street line. City Solicitor Beck said that he had given notice to Donald Ross, the owner of the hotel to the effect that the building operations would have to be discontinued, and he had also served Mr. Ross with a writ. No injunction, had been issued, as that would take some time. Mr. Beck said, however, that if Mr. Ross continued to build it would be at his own risk.

Strathcona

Strathcona, July 31—Night Police-man Harris scooped in a couple of our town juveniles Sunday morning about 3 a.m., who were making night hideous with their howls and conduct. They appeared last evening before Justice Ritchie, who taxed them each \$2 and costs for their hilarity.

The funeral of Samuel H. O'Brien, infant son of Mr. S. A. O'Brien took place today at 2 p.m. from the family residence to Strathcona cemetery.

There will be a meeting tomorrow evening, Wednesday, Aug. 1, at 8.15 in the Orange hall here, for the re-organization and formation of a mechanics' and carpenters' union. All carpenters and mechanics are cordially invited to attend. Mr. A. D. Campbell and others will address the meeting.

Mr. A. Barbe, late of the transfer business in town, came in on the late train from the south last night, from a two weeks' visit to friends and relatives in Winnipeg, Duluth and Michigan. Mr. Barbe reports crops looking well. He is now making arrangements to go out at an early date to the Yellow Head Pass to establish a large ranch there.

Mr. Fletcher, horse-dealer, has just brought in a bunch of horses from the United States and has already disposed of more than thirty of them.

Mr. A. C. Beaton has purchased a house near his own residence on Lumsden avenue, east and has already commenced to enlarge, renovate and modernize it. He will make it attractive and thus take the attention of the many new-comers who are looking for city property.

Mr. W. G. Murray and wife, who lately came into town from N. B., have taken up residence near the Duggan street school. They will soon be joined by Mr. C. M. Murray, late of the United States. We understand these gentlemen purpose investing largely in Northern Alberta.

The L.O.O.F. of town held their regular meeting in their hall in the Douglas block last night, at which important business was discussed and settled.

Mr. T. H. Nunn came into town from Winnipeg on the late train last night from several days' visit to that city.

Mr. Hugh McArthur of the Daysland district, left town this morning on the 8.20 train en route for Durham, Ont., his old home. On his return trip he purposes to bring a steam threshing outfit. He is one of a party of Ontario men who have about 2,000 acres north of Daysland. They are importing a steam plow also and will go farming on an extensive scale. Mr. McArthur has managed a large estate in the United States and is a "hustler." He is a relative of Mr. Beaton.

Strathcona, July 31—The Presbyterian Sunday school of Strathcona purpose holding their annual picnic next Thursday on Walter's flat.

The managers of the Strathcona Industrial Association purpose holding an exhibition of grasses, grains, vegetables, etc., on October 2nd, 1906. Prizes will be given to school districts. This is a sensible way of advertising Strathcona and district and the hearty co-operation of the farmers will make this exhibition a success. There will also be a good program of sports.

Mr. E. A. Knapp, manager of the Douglas Bookstore here, son Roy and Mr. Wm. McMahon, who have been about 130 miles up the Saskatchewan are back again. The party went up the river by a steamer which is now fast on a bar away up the river, and returned on a gasoline launch, making 13 miles per hour with the breeze.

Alderman Richards has returned from a family pleasure trip and residence at Cooking Lake.

Mrs. J. Sighy, of Barkhead, B.C., is in Strathcona visiting her parents, and Mrs. F. Buhner, Whyte avenue east.

A G.T.P. contractor was in town today from the Battleford district, seeking men for construction work in that region.

Miss Winifred John, the celebrated young violinist of London, England, is visiting with her friends the Misses Mohun at Ferne Lodge.

CITY OF EDMONTON

To Contractors
TENDERS are requested for grading on McKay avenue and formation of boulevards on Third street, H. B. R., also for construction of certain sewers. Plans and specifications may be seen and forms of tender obtained on application at the City Engineer's Office. Sealed tenders addressed "City Commissioner" to be delivered not later than Tuesday August 7th.

GEO. J. KINNARD,
Secretary-Treasurer.

THE "LITTLE GIANT" TANK

A successful letter press copy depends upon amount of moisture in cloths. Our "LITTLE GIANT" will give any amount you want. Notice the wing nut on top, when screwed down this compresses a spring, made of spring made of special steel, which has a bearing at each end of rolls and distributes an equal pressure. The only manner in which equal pressure can be secured.

The arch casting has holes in it, so that it can be secured to desk or table.

FINISH IS IN BLACK JAPAN AND GOLD WITH NICKEL-PLATED TRIMMINGS

Pan is 11 1/2 x 15 x 2 1/2 inches of Galvanized Iron Finished same as Tank.

We use a special grade of rubber on our rolls and guarantee tank throughout.

Price is Low. Sole Agents—

See us at the Wingold store.

Alfred Kellow & Co.,
56 McDougall Ave.

3 Doors South of Jasper.

Mr. W. G. Murray and wife, who lately came into town from N. B., have taken up residence near the Duggan street school. They will soon be joined by Mr. C. M. Murray, late of the United States. We understand these gentlemen purpose investing largely in Northern Alberta.

The L.O.O.F. of town held their regular meeting in their hall in the Dundas Hotel last night at which important business was discussed and settled.

Mr. T. H. Nunn came into town from Winnipeg on the late train last night from several days' visit to that city.

Mr. Hugh McArthur of the Daysland district, left town this morning on the 8:20 train en route for Durham, Ont., his old home. On his return trip he purposes to bring a steam threshing outfit. He is one of a party of Ontario men who have about 2,000 acres north of Daysland. They are importing a steam plow also and will go farming on an extensive scale. Mr. McArthur has managed a large estate in the United States and is a "hustler." He is a relative of Mr. Beaton.

Strathcona, July 20.—The Presbyterian Sunday school of Strathcona purpose holding their annual picnic next Thursday on Walter's flat.

The managers of the Strathcona Industrial Association purpose holding an exhibition of grasses, grains, vegetables, etc., on October 2nd, 1906. Prizes will be given to school districts. This is a sensible way of advertising Strathcona and district and the hearty co-operation of the farmers will make this exhibition a success. There will also be a good program of sports.

Mr. E. A. Knapp, manager of the Douglas Bookstore here, says Roy and Mr. Wm. McMahon, who have been about 130 miles up the Saskatchewan are back again. The party went up the river by a steamer which is now fast on a bar away up the river, and returned on a gasoline launch, making 13 miles per hour with the current.

Alderman Richards has returned from a family pleasure trip and residence at Cooking Lake.

Mrs. J. Sigby, of Barkhead, B.C., is in Strathcona visiting her parents, Mr. and Mrs. F. Buhrer, Whyte avenue east.

A G.T.P. contractor was in town today from the Battleford district, seeking men for construction work in that region.

Miss Winifred John, the celebrated young violinist of London, England, is visiting with her friends the Misses Mohun at Fern Lodge.

CITY OF EDMONTON To Contractors

TENDERS are requested for grading on McKay avenue and formation of boulevards on Third street, H. B. R. also for construction of certain sewers. Plans and specifications may be seen and forms of tender obtained on application at the City Engineer's Office. Sealed tenders addressed "City Commissioner" to be delivered not later than Tuesday August 7th.

GEO. J. KINNARD,
Secretary-Treasurer.
